

New building update

NEW BOATHOUSE DEVELOPMENT HAS STARTED

Less than a week after we moved out, most of the old boathouse has been demolished, and work will shortly be starting on laying the foundations and slab for the new two-storey boathouse. Full rowing operations will continue as normal over the Winter, with all boats being stored outside in the compound, and all blades and other equipment in the sculling shed. Temporary changing rooms and a club-room have been installed behind the sculling shed.
