

Walton Rowing Club

Boat storage

Members may store boats at the Club subject to the following conditions:

1. This facility is only offered to full and junior members who have paid or are paying their subscription for the current year, and on payment of the agreed rack fee.
2. Availability of racks is at the Committee's discretion; members must have written agreement before storing a boat at the Club. If there is insufficient space, the Committee may propose an outside rack or limited-access rack. If a boat is not regularly used, the committee may require the member to accept a storage or limited-access rack.
3. Boat storage other than in the main boathouse is on leased land, and is subject to the conditions of that lease. Continued availability of racks in this area is subject to periodic renewal of this lease.
4. If the member fails to pay his or her subscription and rack fee by the due date (normally 31st January) the Club may ask that the boat be removed, or may take steps to remove it so that the rack may be used by other boats.
5. The rack fee includes registration of the boat with British Rowing and the Environment Agency; the Club will allocate a WLT number to the boat and it is the member's responsibility to mark the boat with that number.
6. It is the member's responsibility to insure the boat and keep it in water-worthy condition. The Club accepts no responsibility for damage to members' boats stored at the Club, however caused.
